About IMAS

IMAS is a professional accountancy training institution, specialising in offering the Chartered Institute of Management Accountants (CIMA), the Institute of Certified Bookkeepers (ICB) and Association of Chartered Certified Accountants (ACCA) qualifications. IMAS was established in 2013 with the aim of broadening access to high-quality professional accountancy education to aspiring Chartered Management Accountants. IMAS has positioned itself to play a meaningful role in supporting the country to realise its aspiration as encapsulated in the NDP of training and developing highly skilled graduates. The National Skills Fund identified accountants and finance managers among the skills in shortage in South Africa and we aim to bridge that gap with our CIMA, ICB and ACCA offering.

IMAS is dedicated to continuing to deliver the highest standard of lecturing and student support with the focus on guiding students to realizing their dreams of becoming professional accountants. The qualifications offered at IMAS are globally recognized, enabling IMAS graduates to succeed wherever they go. IMAS develops strategic thinkers with the capability of being business leaders, whilst offering current business leaders the opportunity to gain greater knowledge of business practices. IMAS qualifications are suited for the 4th Industrial Revolution, ensuring our students are not left behind.

IMAS is accredited by both Quality Council For Trades & Occupations(QCTO) and the Finance and Accounting Services SETA (FASSET), a SETA responsible for the accounting and finance sector in South Africa.

(QCTO) Accreditation Number: 20-CIMA/ACC/1220110 and FASSET Accreditation Number: A585000052).

The CIMA Difference

CIMAVision

CIMA joint venture with the AICPA brought us the CGMA designation - Chartered Global Management Accountant. The CGMA mission is to promote management accounting and the value that management accountants add to an organisation. The CGMA designation signifies that you are a trusted business strategist who can apply non-financial qualitative information along with financial analysis to understand all aspects of the business. The designation continually sharpens business acumen by providing the tools, reports and research holders need to help drive sustainable business success.

Relationship with the Business Community

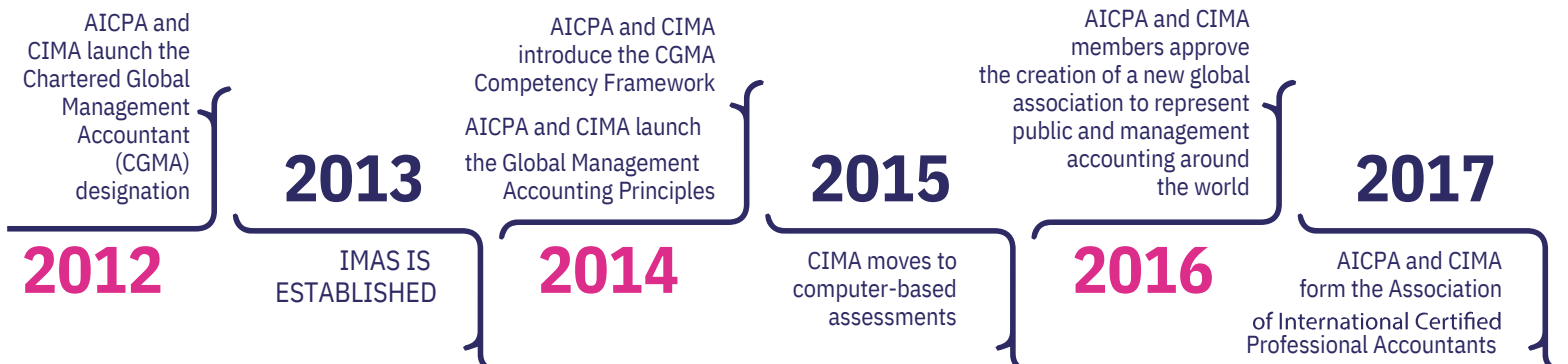

We revise our syllabus regularly based on business trends and the employment needs of businesses globally. How do we do that? We run extensive, interlocking research with employers globally to understand the type of employees they are looking for to drive business forward.

The CGMA Competency Framework: Foundation of the CIMA Syllabus

With the information we have from employers globally, we developed a framework which shows the skills and competencies that finance professionals need to boost employability. The framework provides the foundation for our 2019 syllabus and assessment methods as well as our continuous professional development strategy. This ensures CGMA designation holders are competent and confident management accounting professionals who can guide and lead sustainable business success.

Innovation in Assessment Technology

To make CGMAs even more employable, we have pioneered a combination of computer based assessments that not only test our students knowledge but also their ability to apply this knowledge in the business environment.

Benefits of choosing **CIMA**
